Education

Indiana University Bloomington *May 2027*
Luddy School of Informatics, Computing and Engineering *GPA: 3.79/4.0*
Bachelor of Science in Computer Science | Business and Data Science Minors | Specialization in AI
Honors: *IT Consultant of month October '24, Dean's list Fall '23, Direct Luddy admit.*

Technical Skills

- **Programming**: Python, HTML, CSS, Java, C/C++, JavaScript, SQL
- **Other**: TensorFlow, PyTorch, SAP, Oracle, Adobe Photoshop, Adobe XD, React.js, Linux, Unix
- **Certifications: AWS** Certified Cloud Computing Practitioner

Work Experience

IT Consultant Supervisor | *University Information Technology Services,* *Indiana University* *Oct 2024 – Present*

- Oversee campus tech infrastructure by utilizing **ServiceNow** ticket analysis and support tools, spearheading network diagnostics, and troubleshooting campus-wide tech stack, optimizing email, learning software, and enterprise storage solutions.
- Optimizing resource allocation of technical teams and front-line support staff, enhancing service delivery across campus facilities.
- Cultivate professional growth of **25+ technical support consultants** through strategic performance coaching and targeted employee development meetings, ensuring continuous service excellence.
- Ensuring seamless operation of campus-wide tech stack, supporting various platforms and services.
- Pioneer quality assurance through regular shift audits and performance evaluations.

Software Engineer Intern | *Steel and Tube Industries Ltd.,* *Uganda* *Feb 2023 – July 2023*

- Leveraged **SAP** to analyze vast datasets, fostering a **12%** improvement in alignment across production, sales, finance, and accounting departments.
- Engineered specialized Python software to optimize zinc coating weight calculations, elevating product quality and manufacturing effectiveness of stainless steel by **10%.**
- Reimagined employee affairs management with **EnQuest**, boosting recruitment and staff evaluation efficiency by **13%.**
- Pioneered integration of social media features into the e-commerce platform, boosting sales by 15% in 5 months.

Projects

PixelScout | Python, TensorFlow/Keras, NumPy, Matplotlib *June 2024 – Present*

- Innovating a **CNN-**based image classification system with **TensorFlow/Keras**, achieving **95%** accuracy on CIFAR-10 dataset. Reducing manual classification time with a modular design, user-friendly interface, and visualization tools.

EazyFlow | Python, NumPy, scikit-learn *May 2024 – Present*

- Engineered an AI-driven traffic system, integrating data from **500+** smart intersections. Used **NumPy** and **scikit-learn** for data handling and predictive modeling, optimizing traffic flow, reducing wait times, and cutting emissions.

AveMenu | Java *April 2024 – August 2024*

- Developed a **Java**-based Hotel Menu System application utilizing **object-oriented programming** principles, featuring real-time order processing, dynamic menu management resulting in streamlined operations and improved efficiency for hotel staff.

Winner(3rd) – ALDI AI Case Competition | *Business Class BUS-K201*, *Indiana University* *Jan 2024 – May 2024*

- Spearheaded comprehensive analysis of ALDI's retail business model, unveiling key operational challenges.
- Crafted and presented an AI-driven solution at **ALDI HQ** in Chicago, IL projecting a **4-8%** sales boost.

Underrepresentation in technology | *Informatics Class INFO-I101,* *Indiana University* *Sept 2023 – Dec 2023*

- Designed and launched an interactive website using **HTML, CSS,** and **Adobe XD**, increasing recognition of underrepresented tech figures by **8%** as measured through online surveys and boosted community engagement.

Community Involvement

Senator | *National Society of Black Engineers,* *Indiana University* *April 2024 – Present*

- Execute fundraising events, boosting chapter participation in regional, national conventions and local charities.
- Develop strategic initiatives to boost member acquisition and retention, achieving **30%-**chapter growth.
- Cultivate professional and social skills among members, accelerating their career trajectories.

Student Ambassador | *Luddy School of Informatics, Computing and Engineering*, *Indiana University* *Jan 2024 – Present*

- Spearhead outreach initiatives for high school students and parents, highlighting Luddy's innovative tech degrees and vibrant student life through engaging faculty presentations while introducing career services and academic advising teams.

Undergraduate Student Representative | *Machine Learning for All Club,* *Indiana University* *Jan 2024 – Present*

- Led a team to integrate machine learning with **IoT** devices, creating a smart home prototype that optimized energy use by **3%.**
- Completed **100+** hours of **Python** coding, specializing in deploying **machine learning models** in real-world applications.
